This approach helps children read more smoothly and understand texts more effortlessly, laying a solid groundwork for future literacy skills. In this article, we will explore the key aspects of sight words for prep students within the Australian curriculum, including what they are, how they are taught, and practical strategies for educators and parents to support early reading development.

Understanding Sight Words in the Context of the Australian Curriculum

What Are Sight Words?

Sight words, often referred to as high-frequency words, are words that appear most commonly in written language. They are words that children are encouraged to recognize instantly, without needing to sound them out. This immediate recognition helps increase reading fluency and reduces cognitive load, allowing students to focus on comprehension rather than decoding.

Examples of common sight words include "the," "and," "it," "you," "was," and "said." While many of these words follow regular phonetic patterns, others are irregular and cannot be decoded easily, making memorization of these words particularly important.

The Role of Sight Words in the Australian Curriculum

The Australian Curriculum for Prep (or Foundation Year) prioritizes the development of early literacy skills, including phonemic awareness, phonics, vocabulary, and comprehension. Recognizing and memorizing sight words is integral to this process because:

- Enhances reading fluency: Recognizing words instantly allows children to read with greater speed and expression.
- Supports comprehension: When decoding is automatic, children can devote more mental resources to understanding the text.

- Builds confidence: Early success with familiar words fosters motivation and a positive attitude towards reading.

The curriculum incorporates specific expectations around the recognition of high-frequency words, often including lists that students are encouraged to learn throughout their prep year.
