Expected Answer:

Prokaryotic cells lack a true nucleus and membrane-bound organelles, whereas eukaryotic cells have a nucleus and specialized organelles. Examples of prokaryotic cells include bacteria, while animals and plants are composed of eukaryotic cells.

Genetics and Inheritance

Sample Question:

Explain how the principles of Mendelian inheritance apply to the inheritance of flower color in pea plants.

Expected Answer:

Mendelian inheritance involves dominant and recessive alleles. If purple flower color is dominant over white, crossing heterozygous plants (Pp) results in a 3:1 phenotypic ratio, with three purple-flowered plants to one white-flowered plant.

Human Body Systems

Sample Question:

Illustrate and label the pathway of oxygen from inhalation to its exchange in the bloodstream.

Expected Answer:

Oxygen enters through the nose or mouth, passes down the trachea, into the bronchi, then the bronchioles, reaching alveoli where gas exchange occurs. Oxygen diffuses into capillaries surrounding alveoli, while carbon dioxide diffuses out.
